

GO-Dense K50

Liquid potassium fertilizer (500 g/L) with chelating agent EDTA

Characteristics

- Formulation with the highest concentration of potassium in liquid form - 500 g/L.
- Presents a unique formulation in the market based on high quality raw materials with dispersing and suspension agents.
- GO-Dense K50 is an ideal formulation for complementing crop nutrition in fruit development stages.
- The high concentration of chelating agent (EDTA) increases absorption and accelerates potassium metabolism in the plant.

Declared Content	% w/v	% w/w
Total Nitrogen (N)	4.5	3.0
Ureic Nitrogen (N)	4.5	3.0
Water soluble Potassium Oxide (K ₂ O)	50.0	33.0
Chelating agent EDTA	2.1	1.4

Indication of Crops, Doses and Recommended Terms of Use

Use for foliar application on all crops after flowering, several times during fruit set and development stages:

Crops	Dosage (L/Ha)
Cereals	1.5 - 3.0
Industrial crops (legumes, sugar beet, oilseed)	1.5 - 3.0
Maize, potatoes	2.0 - 3.0
Vegetables	2.0 - 4.0
Berries and orchards	2.0 - 4.0

Storage Instructions

Do not store under the crystallisation temperature. View SDS.

Precautionary Statements

Shake well before use. Use only in case of a recognised need. Do not exceed the recommended dose.

P102: Keep out of reach of children.

P270: Do not eat, drink or smoke when using this product.
